

FAM12D14H08

The filter holder FAM12D14H08 allows add Filters* to standard S-Mount (M12x0.5) Lenses and to modify the F# of Front Iris lenses. This set consists of one holder, two nylon rings and one lock ring.

When used for iris modifications of front iris lenses :

First drop the lens into the lens holder, then drop the new iris* into the holder and a Nylon ring. A lock ring presses Nylon ring and iris firmly onto the lens.

When used as filter holder:

First drop the lens into the lens holder, then a Nylon ring that protects the custom filter from scratches, then another Nylon ring. A lock ring presses Nylon rings and filter firmly onto the lens.

Holder height: 8 mm
max. filter height: 3 mm
Lens diameter: 14 mm

* Irises and filters are not part of the package and can be bought separately from Lensation
